In support of Bill 5283

My name is Young Ran Won, and I have a son, Jay Lim who is attending Suffield High School in Agriscience Science program since last year. He loves agriculture so I am so happy that my son is on the right track for his future. I am so thankful for this agriculture education which provides many positive impacts on my son's academics, social skills and confidence. I believe equal access through funding and awareness are so important and critical so all students like my son who love for agriculture can experience and get so much benefit for their successful future through the Agriculture Education Program.

Thank You,

Young Ran Won
